## PHOTO OR VIDEO?

Photography freezes a moment in time, capturing the essence of an emotion or a single frame of a story. It allows you to relive that special moment, immersing yourself in the details and emotions captured within a single image.

On the other hand, videography brings your story to life, capturing the dynamic motion, sounds, and emotions of a particular moment or event. It creates a captivating narrative, allowing you to not only see but also hear and feel the essence of the moment, preserving the full spectrum of memories.

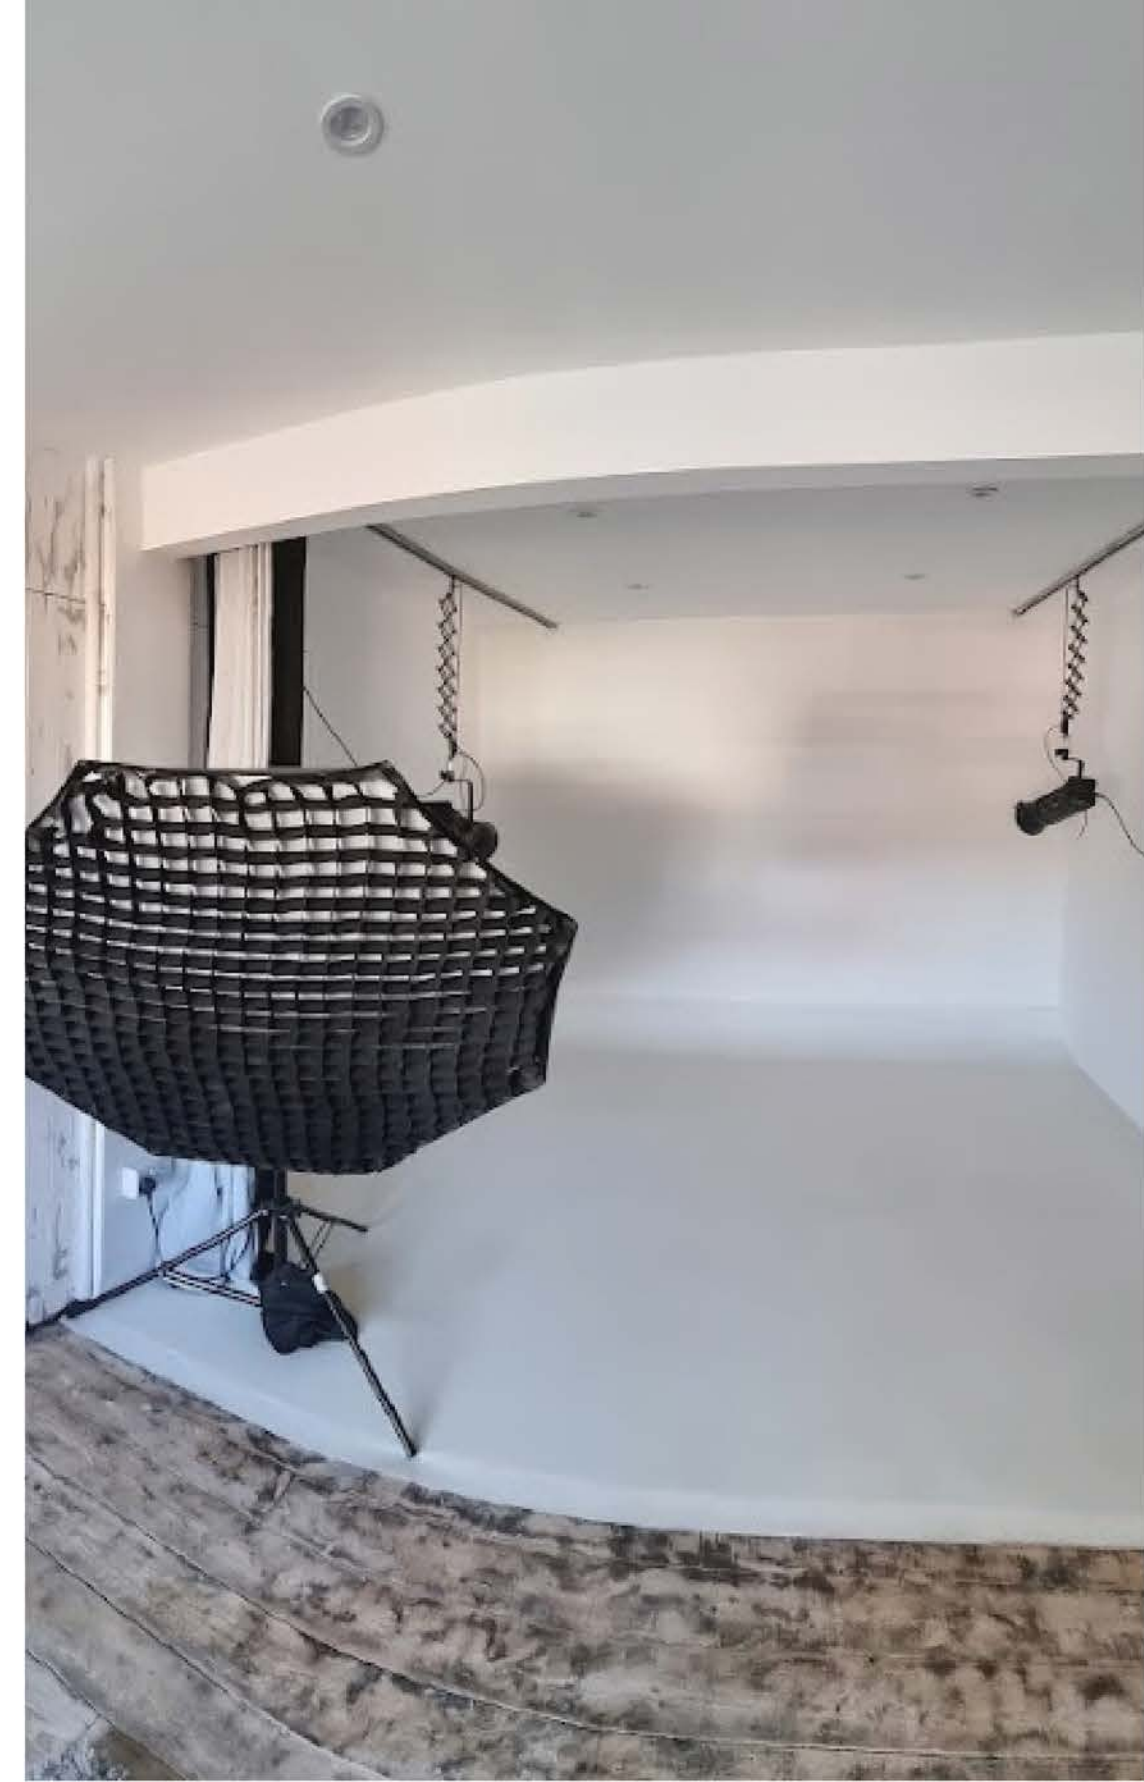

*LET'S DO IT!*

# THE STUDIO

Shooting in the studio provides a controlled environment. With professional lighting and a variety of backdrops, we can create stunning, timeless portraits that highlight your best features.

The studio setting allows for privacy, comfort, and flexibility in creating different looks and themes. It's an ideal choice for capturing beautifully composed images with a clean, polished aesthetic.

# ON LOCATION

On-location shoots offer the freedom and versatility to capture your moments in a setting that holds special meaning to you. Whether it's your favourite park, the beach, or your cosy home, on-location photography brings a natural and authentic feel to your images.

The familiar surroundings add a personal touch, allowing your true emotions and connections to shine through.

## OUR REVIEWS

*"A really personable experience for my three-year-old daughter. Olivia took the time to really get to know her, interact and play with her to produce the most beautiful pictures. It was a wonderful family experience which felt very comfortable and natural and Olivia managed to capture family moments and accents that will no doubt take pride of place in our family home for years to come. Thank you Olivia!"*
